

WAX-RESIN COLOURS

For Near Edge Printers

Recommending a ribbon

What is the application?

What is the label stock and how wide is it?

What level of durability is required?

What thermal printer is being used?

NETColour

Premium colour wax-resin ribbons

Netcolour wax-resins can be used to compliment and enhance velum, coated paper and synthetic labels. The effect can be solely aesthetic or colours can be used to provide sorting or directional information.

Netcolour ribbons are the result of combining premium wax-resin colour formulations and innovative near edge technology (NET™). This range offers vibrant process and spot colours suitable for printing graphics, text and logos. In addition to producing exceptional output quality at high printing speeds, these inks also offer flexibility and excellent abrasion resistance.

Netcolour is available in process colours and 6 spot colours.

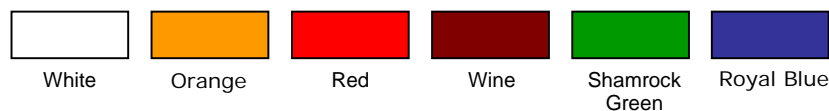

Benefits

- Good mechanical resistance
- Assures quick visual recognition
- Process and spot colours available

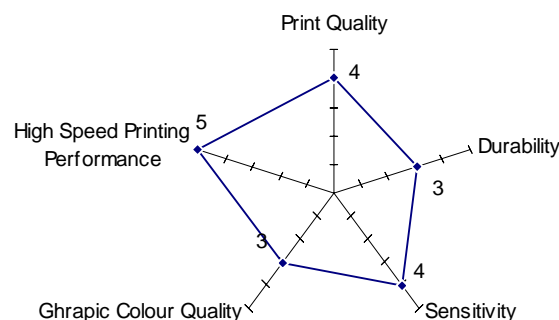

Applications

- Colour coding
- Inventory tracking
- Shelf and Bin labelling
- Retail tag and Label applications
- Textile and apparel tickets
- Nursery and umber
- Flexible Packaging applications

Spot Colours
